TREATMENT FOR CATS WITH HYPERTROPHIC CARDIOMYOPATHY (HCM/HOCM) AND STAGE C CONGESTIVE HEART FAILURE (CHF)

PLEASE INFORM YOUR FELINE PATIENTS' OWNERS ABOUT THIS CLINICAL STUDY

We would like to inform you that the below listed veterinary practice is taking part in a clinical study researching an investigational medicinal product to treat cats with **diagnosed HCM/HOCM and previous CHF**.

OVERVIEW OF THE STUDY

The study duration is up to 4.5 years. It is a double-blind, placebo-controlled study in which cat owners administer a **liquid** solution to their pets orally **once daily.** The goal of the study is to prolong the life of the cats. ALL cats in the study will receive standard of care according to the guidelines of the American College of Veterinary Internal Medicine (ACVIM).

REQUIREMENTS FOR PATIENTS*

- Primary cardiomyopathy (HCM/HOCM) and CHF in the past 60 days
- A limited number of other phenotypes are also permitted
- Clinically stable

**This is not an exhaustive list. Contact one of the participating veterinary practices/clinics if you have any questions.*

FREE CARE

All of the services required as part of the study are covered by the study sponsor, including:

- Examinations of the heart and respiratory tract
- Blood and urine tests including haematology, biochemistry, total thyroxine, fructosamine, NTproBNP and cTnI
- Diagnostic tests including echocardiograms, X-rays of the chest and systolic blood pressure

HOW TO REFER PATIENTS

It's easy to refer your patients. To get more information, just contact the participating veterinary practices/clinics or email and mention the cat study.
